

# A Vision For The Future

"An education is the most powerful tool we can give our children. Inspiring our people to learn and grow strengthens our families, culture and communities in unmeasurable ways. More educated communities are healthier communities.

My vision for the future of the Arctic is a highly educated workforce and a locally controlled region that's prepared to pursue the abundance of opportunities in front of us. A future where our youth and Elders work together to preserve the past while paving the way for a prosperous tomorrow."

*- Dr. Pearl Kiyawn Brower*
